Career Objective

IT fresher with a strong foundation in Java, Python, Spring Boot, HTML, CSS, MySQL, and DBMS, seeking an entry-level IT role to apply my skills in software development, problem-solving, and technical troubleshooting. Hands-on experience building REST APIs through a Spring Boot-based microservices project, along with AI/ML, NLP, and IoT projects delivering measurable outcomes. Strong analytical ability, clear communication skills, and a genuine willingness to learn new technologies and collaborate effectively within cross-functional teams.

Technical Summary

- **Programming Languages:** Java, Python
- **Backend & Frameworks:** Spring Boot, Microservices, REST APIs (hands-on project experience)
- **Web Development:** HTML, CSS
- **Database Management:** MySQL, DBMS
- **AI/ML:** Machine Learning, Deep Learning, NLP (BERT-based models)
- **Core Concepts:** Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, SQL
- **Tools & Version Control:** Git, Maven, GitHub
- **Platforms:** Arduino, Sensors, Embedded Systems
- **Soft Skills:** Problem Solving, Analytical Reasoning, Communication, Teamwork

Certifications

- Certified in Java Programming
- Certified in NLP, Machine Learning, and Deep Learning
- Presented paper "Cyberbullying Detection using BERT Multimodal Aspects" at ICNEXT'25

Education

B.Tech, Information Technology

Manakula Vinayagar Institute of Technology, Puducherry | 2021-2025 | CGPA: 8.29

HSC

Maruthi Matric Higher Secondary School, Puducherry | 2020-2021 | Score: 86.29%

SSLC

Maruthi Matric Higher Secondary School, Puducherry | 2018-2019 | Score: 79.6%

Projects

Employee Payroll Microservices System

Java, Spring Boot, Microservices, MySQL | 2026

- Built a Spring Boot microservices application using REST APIs and MySQL.
- Designed independent services for employee records, salary computation, and payroll processing, strengthening backend and API development skills.

Cyberbullying Detection using BERT Multimodal Aspects

Python, AI/ML, NLP | Final Year Project, 2024-2025

- Developed a multimodal cyberbullying detection system using BERT for text analysis and Pytesseract (OCR) to extract text from images.
- Implemented the solution in Python using the Kaggle Cyberbullying Dataset to detect abusive content from text and image-based inputs.

Air Quality Monitoring System

Arduino, NodeMCU, MQ135, DHT11, Blynk | 2023

- Developed an IoT-based air quality monitoring system using Arduino Uno, NodeMCU, MQ135, DHT11, and Blynk IoT.
- Enabled real-time monitoring of air quality, temperature, and humidity through the Blynk IoT application.

Internship

VEI Technologies Pvt. Ltd.

IoT Intern | Feb 2023

- Learned IoT concepts, Arduino programming, and sensor interfacing.
- Assisted in developing and testing a basic IoT mini project using Arduino and sensors.
- Submitted a mini project report as part of the internship.
